

# THE HEAVENS DECLARE

## *Astrological Ages and the Evolution of Consciousness*

### *Revised Edition*

Alice O. Howell  
Foreword by Sylvia Perera,  
Jungian Analyst

*The implications are staggering! Why don't more people know about these things?*

**S**o wonders Alice O. Howell about the fascinating ideas in this book.

One of the most profound astrologers of today, she is also an authority on Jungian psychology. Her view of astrology as symbolic of archetypal processes offers a tool for healing the psyche. It also achieves a bold synthesis of history, religions, mythology, and Jung's concept of the collective unconscious. Based on irrefutable archaeological evidence, Howell traces the evolution of consciousness through five of the great astronomical Ages of the past ten thousand years. First she explains the logic of the signs so that we can then marvel at the synchronicities.

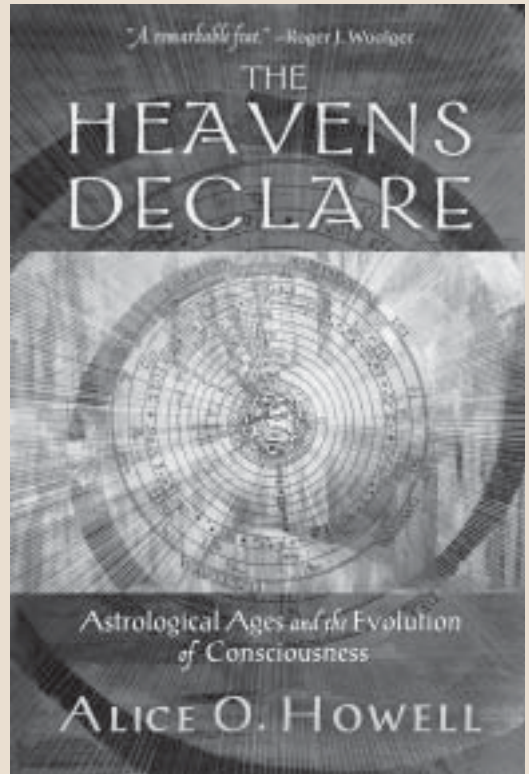

Her findings imply a reconciliation of the Piscean dichotomy of faith and reason that has dominated thought for two millennia. (Consider the current movement to marry physics and spirituality.) This leads her to speculate about humanity's tasks and traps in the future. "As prophesied, the world's not ending," she laughs. "Just the Age. And here comes the next!"

Simply written as letters to a friend, *The Heavens Declare* is full of warm advice as it inspires us to experience one flash of insight after another.

*Alice O. Howell's mature, inspired knowledge is of the greatest importance. Read her closely and with abundant pleasure as she twists your view of reality into a new appreciation of what matters.*

# HIDDEN WISDOM

*A Guide to the Western Inner Traditions  
Revised Edition*

Richard Smoley and Jay Kinney

All those inspired by *The DaVinci Code* could not find a better overview of the mystical riches indigenous to the West. With even-handed objectivity, the authors present the history, ideas, and strengths and weaknesses of various esoteric traditions and provide helpful suggestions for further reading.

They begin with the psychology of C. G. Jung, as they say, "not only because he stated the predicament of modern humanity with unusual force and clarity, but because his ideas are a common entry point for many people interested in spirituality today." Their subjects then range widely from Gnosticism and Esoteric Christianity to the Kabbalah, Magic, and Neopaganism; and from Shamanism and Alchemy to Sufism, Secret Societies, and the work of Gurdjieff.

In addition, Richard Smoley provides a new introduction speculating on why there is such a current resurgence of interest in Western spirituality. Whether you are just beginning to search for a spiritual practice or want to know more about a particular teaching, you will find *Hidden Wisdom* an invaluable guide.

# ECHOES FROM THE GNOSIS

G. R. S. Mead

Edited by John Algeo

Introduction by Robert A. Gilbert

Commentary by Stephan A. Hoeller

100th Year  
Anniversary  
Edition!

*The centennial republication of Mead's best work is a welcome event in the midst of what appears to be a twenty-first century Gnostic revival.*

—Robert Ellwood, Distinguished  
Professor Emeritus of Religion,  
University of Southern California

Long before the Nag Hammadi Library was discovered, G. R. S. Mead had translated ancient Gnostic texts from Christian, Roman, and Greek sources. First published between 1906 and 1908, here is the entire collection of his eleven volumes on Gnosticism, including "The Hymn of Jesus" and "The Wedding Song of Wisdom." Each work focuses on a particular text and includes historical background, informed hypotheses about its origins, and literary interpretation.

Having devoted his life to esoteric studies, Mead had a unique understanding of the complex symbolism within his subject. The reader may be surprised to learn, as Mead suggests, that some of these texts initially were not even intended to be read as books, but instead were used in mystery rituals and songs.

Editor John Algeo preserves Mead's own inspired language. To enhance it for today's readers, Gnostic scholar Stephan Hoeller provides explanatory essays, and Robert Gilbert, a world authority on Mead, provides a biography. Newcomers as well as those familiar with Gnosticism will treasure this new edition for how it makes accessible Mead's deep insights into the visionary religion that is newly attracting spiritual seekers.

# THE VISIONARY WINDOW

*A Quantum Physicist's Guide to Enlightenment*

Amit Goswami, Ph.D.,

Featured physicist of *What the Bleep Do We Know!?*

*I have rarely read a book that gave me so much hope. . . . Brilliant answers to the most gripping questions ever asked.*

—from the foreword by Deepak Chopra

What's more real—this catalog you're reading or your awareness of it? Astoundingly, Dr. Goswami says that it's your awareness. The catalog, like everything else, doesn't completely exist until you are conscious of it.

That's absurd, you say? This quantum physicist can prove it as perhaps no other could. Reared in the sacred Hindu tradition, Goswami shows how the new science verifies what mystics have always known: that consciousness, not matter, is the ultimate ground of being. Playfully quoting everyone from Einstein to Forrest Gump, Goswami integrates cognitive psychology, Eastern philosophy, and quantum physics to assert a new scientific paradigm that places human values first. Its principles can help us tap our creativity, deepen our spirituality, and live as truly liberated beings.

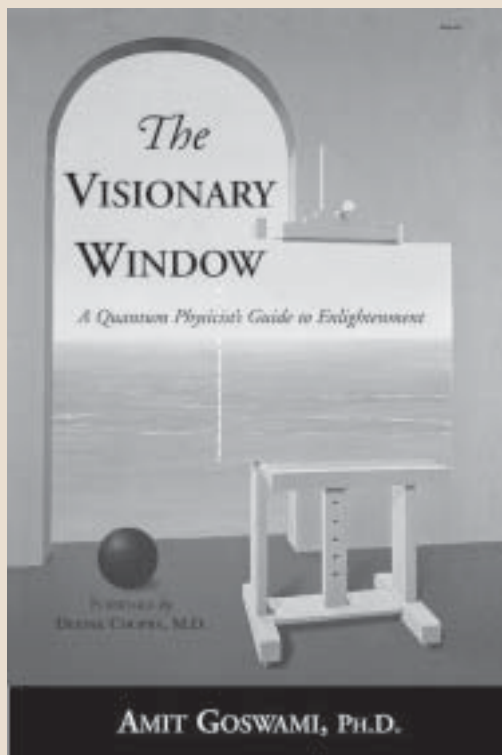

*If you choose to read one book introducing you to quantum physics and spirituality, choose The Visionary Window. You're in for a profound awakening.*

# IN SEARCH OF P. D. OUSPENSKY

*The Genius in the Shadow of Gurdjieff*

Gary Lachman

The brilliant and seminal work of P. D. Ouspensky, *In Search of the Miraculous*, was the first to interpret the thought of G. I. Gurdjieff, the charismatic, early twentieth-century esoteric master who still commands a global following today. Yet the mysterious Mr. G once dismissively said of Ouspensky that he was "nice to drink vodka with, but a weak man." And some say that their meeting was the overriding catastrophe of Ouspensky's life.

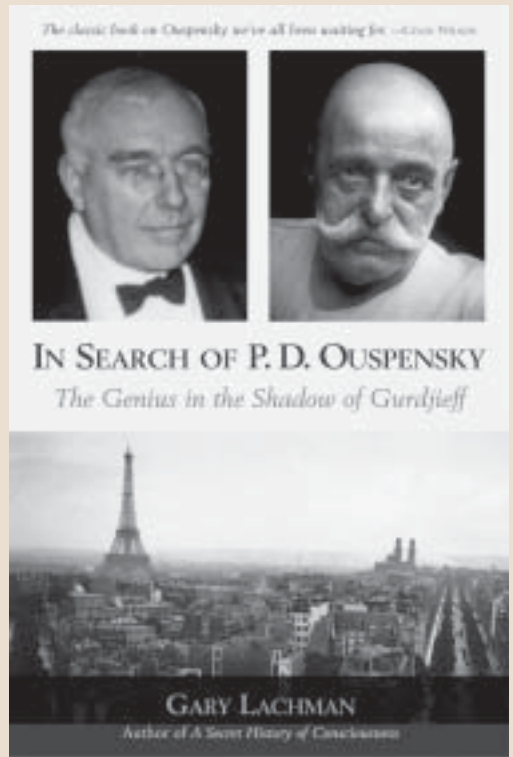

This book highlights Ouspensky's own passionate mysticism, in stark contrast to Gurdjieff's idea of "man as machine." By the time Ouspensky met Gurdjieff, he was already an accomplished philosopher in his own right. What attracted him to Gurdjieff in the first place, and why did he then reject him? Had Gurdjieff turned black magician? And why did Ouspensky continue teaching Gurdjieff's system even after he had repudiated him?

The answers unfold in a mystical adventure story that will enthrall everyone interested in the farthest reaches of being human. This new paperback edition includes a new chapter on author Gary Lachman's former work in Gurdjieff's psychology.

## ESOTERIC CHRISTIANITY

Annie Besant

Edited with a new foreword

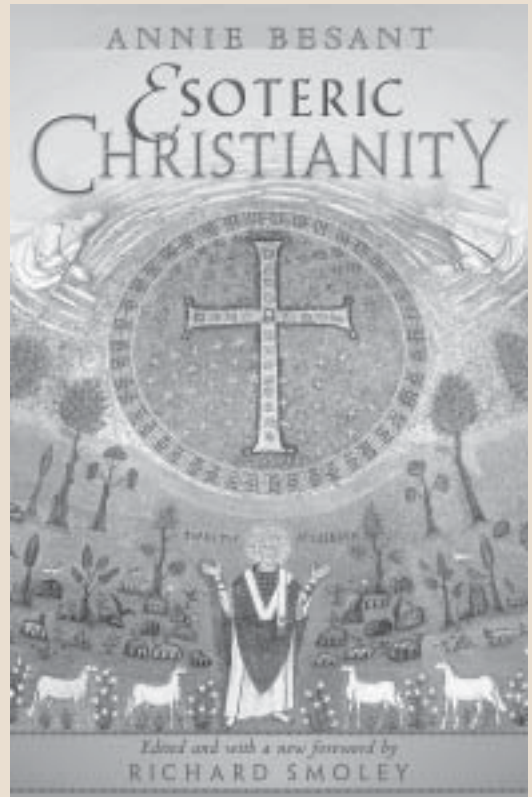

by Richard Smoley

**E**arly Christianity held secrets fully equal to those of other great religions, says renowned esotericist Annie Besant. The first followers guarded these secrets as priceless treasures disclosed only to a few. Besant's aim in this classic work is to restore the deep truths underlying Christian dogma. Until the twentieth-century discovery of the Nag Hammadi scrolls, such truths had been all but lost after the Council of Nicea limited Christian scripture to four Gospels, AD 325.

Besant distinguishes between the Greater Mysteries, which cannot be published, and the Lesser Mysteries—partial unveilings of knowledge—which she reveals in this work. The word *mystery*, she says, is to be understood not as a puzzle but as a window to a higher dimension.

Her view of the Christian story is richly symbolic: She sees Jesus as the rose tree planted in the desert and his birth as a metaphor for the *rebirth* we must all undergo if we are to find the kingdom within. In this vein, her subjects include the mythic Christ, the Atonement, the Resurrection and Ascension, the Trinity, Prayer, Forgiveness of Sins, the Sacraments, and Revelation.

First published in 1901, the book has been updated by Richard Smoley, who provides a new foreword and editorial notes to make it more accessible for modern readers.

*How the Mind Can Defeat Time*

Fred Alan Wolf, Ph.D.

FOREWORD MAGAZINE'S BOOK-OF-THE-YEAR AWARD WINNER!

Featured in the hit film, *What the Bleep Do We Know!?*, Wolf uses modern physics and ancient Hindu practices to show that time travel is a reality we can all experience. In reader-friendly language, Wolf first explores how time and thought are bound together. He then demonstrates how we can defeat time through any spiritual practice—such as meditation—that dissolves the ego. Wolf asserts that quantum physics supports this claim and provides the evidence. He also explains in simple terms such phenomena as black holes, worm holes, and parallel universes.

## The Chakras

C. W. Leadbeater

In Sanskrit, the word *chakra* signifies a wheel. In esoteric thought, it refers to a series of 7 wheel-like vortices that exist on the surface of the etheric double of the human body. This classic describes these 7 spiritual force centers and how to access their potential. With 10 striking color illustrations, clairvoyant Leadbeater explains with great clarity how the vividly colored, blazing whirlpools of energy serve as psychic sense organs and what each chakra means to your welfare. Over 200,000 copies in print.

## Man, Visible and Invisible

C. W. Leadbeater

"One of the most common mistakes is to consider that the limit of our power of perception is also the limit of all there is to perceive," says C. W. Leadbeater. First published in 1902, this classic work of 19-century esoteric thought continues to appeal to readers today. Leadbeater's study of the invisible bodies of humans demonstrates how the colors of an aura change with different emotional states. His aim is to emphasize that we are more than a physical body; rather, we are actual sparks of the Divine. 26 color illus.

## *Vision*

The Theosophical Society in America has a vision of wholeness that inspires a fellowship united in study, meditation, and service.

## *Mission*

The Society encourages open-minded inquiry into world religions, philosophy, science, and the arts in order to understand the wisdom of the ages, respect the unity of all life, and help people explore spiritual self-transformation.

## *Ethic*

The Society holds that our every action, feeling, and thought affects all other beings and that each of us is capable of and responsible for contributing to the benefit of the whole.

We invite you to explore with us and join us in the great adventure.
